

Tre's magnetic visual appeal is the result of precisely rendered angular contours that harness the beauty of symmetry, as well as the dynamic interplay of depth, light and shadow, and the energetic movement of geometric flow. *Tre* enables one to envision and create endless pattern combinations from the simplest minimalist applications to the most elaborate kaleidoscopic masterpieces.

Tre's design concept is an invitation to imagine, play and create. Each tile in the series works as well independently as it does in multi-tile combinations, and maintains its signature visual appeal even in randomised configurations. The *Tre* series is itself a statement in modern tile design as well as a structured medium, which leaves room for limitless interpretations of its core aesthetic.

TRELEMENTS

4 distinct surfaces, 2 levels of thickness, 9 compatible trelements
Infinite design applications

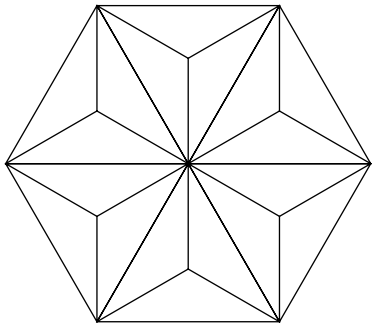

Tre offers designers and architects the ability to easily create intriguing and visually stunning surfaces.

Tre tiles have a height of 185.6 mm and an edge length of 214.3 mm. *Tre I.*, *II.* and *III.* are available in 2 levels of thickness: 26 mm and 41 mm, giving the possibility to create tiered surfaces.

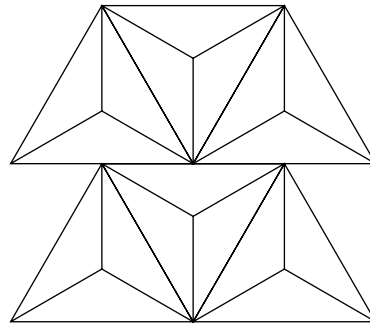

The tiles can be assembled in 2 main ways: either with all vertices and edges aligned, or offset, with the apexes of the tiles aligned with the opposing tile's center point.
